FUND SUMMARY

Investment Objective: The Fund's investment objective is capital appreciation.

Fees and Expenses of the Fund: The following table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees (fees paid directly from your investment)	Investor Class
Maximum Sales Charge (Load) Imposed on Purchases (as a % of offering price)	None
Maximum Deferred Sales Charge (Load) (as a % of original purchase price)	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends and other Distributions	None
Redemption Fee (as a % of amount redeemed, if sold before 30 days)	2.00%
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	1.00%
Distribution and Service (12b-1) Fees	0.25%
Other Expenses	0.47%
Total Annual Fund Operating Expenses	1.72%
Fee Waiver and/or Reimbursement ⁽¹⁾	<u>(0.22)%</u>
Total Annual Fund Operating Expenses After Fee Waiver and/or Reimbursement	<u>1.50%</u>

- (1) The Fund's adviser has contractually agreed to waive its fees and/or reimburse operating expenses of the Fund, at least until April 30, 2017 to ensure that Total Annual Fund Operating Expenses After Fee Waiver excluding any front-end or contingent deferred loads, brokerage fees and commissions, acquired fund fees and expenses, fees and expenses associated with instruments in other collective investment vehicles or derivative instruments (including for example options and swap fees and expenses), borrowing costs (such as interest and dividend expense on securities sold short), taxes, and extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees and contractual indemnification of Fund service providers (other than the adviser)) will not exceed 1.50% of the Fund's daily average net assets. This agreement may be terminated by the Fund's Board of Trustees on 60 days' written notice to the adviser.

Example: The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, you reinvest all dividends and capital gains distributions and that the Fund's operating expenses remain the same (except for the fee waivers and absorbed expenses in the first year). Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$153	\$521	\$913	\$2,013

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal period, the Fund's portfolio turnover rate was 25% of the average value of its portfolio.

Principal Investment Strategies: The Fund's adviser seeks to achieve the Fund's investment objective by investing primarily in a diversified portfolio of equity securities of companies that the adviser believes have above-average future growth potential relative to their peers. The Fund will invest in companies of all sizes traded on any stock exchange in the United States ("Universe"). The Universe is not limited by market capitalization or industry segmentation, but may include large-, mid-, small- and micro- cap sectors. The Fund may, from time to time, invest in fixed income securities to preserve capital while seeking yield or if the adviser believes the equity markets are over-valued. Fixed income securities will primarily consist of government and corporate bonds that are above investment grade. The Fund may invest in other investment companies including exchange-traded funds ("ETF"s) and, occasionally, open-end mutual funds and closed-end funds (together with ETFs, the "Underlying Funds"). The adviser will invest in Underlying Funds when it wishes the Fund to have representation in a certain sector or region but cannot uncover an individual company that meets its investment criteria. The Fund may also employ leverage, including bank borrowing, of up to 33% of the Fund's assets (defined as net assets plus borrowing) for investment purposes.

The adviser selects equity securities based on fundamental, bottom up research. These equity securities consist of common stocks and securities having the characteristics of common stocks that are issued by companies with consistent records of financial performance and strong management teams. Other factors that influence investment decisions include economic and technical analysis. The Fund will invest primarily in domestic companies, but also may invest in securities of foreign issuers.

The Fund will typically have 20-40 equity investments at any time; however, from time to time, there may be more or less than this range. The adviser looks for some of the following characteristics in a company:

- Quality management with direct ownership
- Market leadership
- Strong investment in research & development
- High barriers to entry, including patents, distribution systems, etc.
- New product innovation
- Recurring revenues from disposable products or demand
- Consistent record of financial performance
- Above average expected growth rates in revenues and earnings
- Superior corporate governance
- Attractive valuation

The Fund is non-diversified, which means that it can invest a greater percentage of its assets in any one issuer than a diversified fund. In general, the advisor buys securities that it believes are undervalued and sells a security if its price target is achieved, if the fundamentals have deteriorated or if, in the opinion of the advisor, the security is no longer attractive for investment purposes. The advisor sells short securities that it believes are overvalued or to hedge Fund investments and buys back (covers) these securities if their price target is achieved or the advisor believes the security is no longer attractive for short-sale investment purposes.

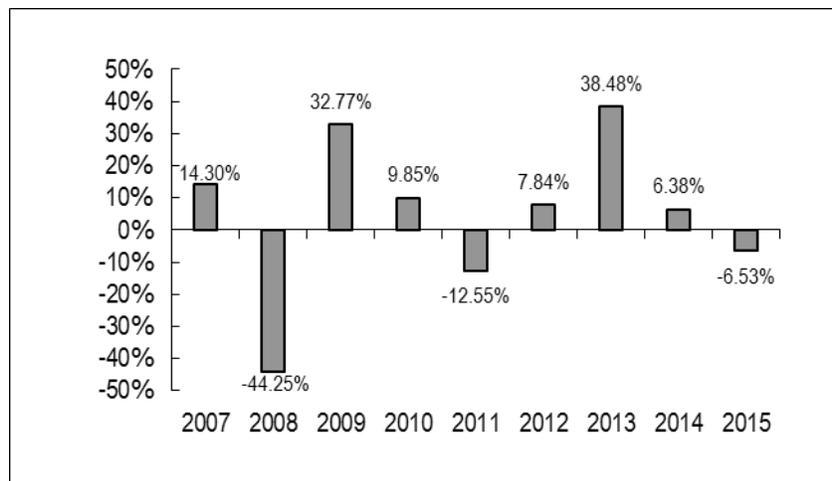

Principal Investment Risks: *As with all mutual funds, there is the risk that you could lose money through your investment in the Fund. Although the Fund will strive to meet its investment objective, there is no assurance that it will.*

- *Equity Risk:* The net asset value of the Fund will fluctuate based on changes in the value of the equity securities held by the Fund or Underlying Funds that invest in U.S. and/or foreign equity securities. Equity prices can fall rapidly in response to developments affecting a specific company or industry, or to changing economic, political or market conditions.
- *Fixed Income Risk:* The value of the Fund's investments in fixed income securities and derivatives will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities and derivatives owned by the Fund. On the other hand, if rates fall, the value of the fixed income securities and derivatives generally increases. Your investment will decline in value if the value of the Fund's investments decreases.
- *Foreign Investment Risk:* Foreign investing, including through ADRs, involves risks not typically associated with U.S. investments, including adverse fluctuations in foreign currency values, adverse political, social and economic developments, less liquidity, greater volatility, less developed or less efficient trading markets, political instability and differing auditing and legal standards.
- *Leveraging Risk:* The use of leverage, such as borrowing money to purchase securities, will cause the Fund to incur additional expenses and magnify the Fund's gains or losses.
- *Management Risk:* The adviser's dependence on technical and fundamental models and judgments about the attractiveness, value and potential appreciation of particular asset classes, securities and Underlying Funds in which the Fund invests may prove to be incorrect and may not produce the desired results.
- *Non-Diversification Risk:* The Fund has a greater potential to realize losses upon the occurrence of adverse events affecting a particular issuer.
- *Prepayment Risk:* Certain types of debt securities, such as mortgage-backed securities, have yield and maturity characteristics corresponding to underlying assets. Unlike traditional debt securities, which may pay a fixed rate of interest until maturity when the entire principal amount comes due, payments on certain mortgage-backed securities may include both interest and a partial payment of principal. Besides the scheduled repayment of principal, payments of principal may result from the voluntary prepayment, refinancing, or foreclosure of the underlying mortgage loans.
- *Short Sale Risk:* Positions in shorted securities are often speculative and riskier than "long" positions (purchases). Unlike long positions, losses on short positions are potentially unlimited.

- *Small and Medium Capitalization Stock Risk:* Stocks of small and medium capitalization companies may be subject to more abrupt or erratic market movements than those of larger, more established companies or the market averages in general.
- *Underlying Funds Risk:* ETFs, mutual funds and closed-end funds are subject to investment advisory fees and other expenses, which will be indirectly paid by the Fund. As a result, the cost of investing in the Fund will be higher than the cost of investing directly in ETFs, mutual funds and closed-end funds and may be higher than other mutual funds that invest directly in stocks and bonds. The ETFs in which the Fund invests will not be able to replicate exactly the performance of the indices they track and the market value of ETF and closed-end fund shares may differ from their net asset value. Underlying Funds are subject to specific risks, depending on the nature of the fund.

Performance: The bar chart and performance table below show the variability of the Fund’s returns, which is some indication of the risks of investing in the Fund. The bar chart shows performance of the Fund’s Investor Class shares for each full calendar year since the Fund’s inception. The performance table compares the performance of the Fund over time to the performance of a broad-based market index. You should be aware that the Fund’s past performance (before and after taxes) may not be an indication of how the Fund will perform in the future. Updated performance information is available at no cost by calling 1-800-672-9152.

Performance Bar Chart For Calendar Years Ended December 31,

Best Quarter: 2nd Quarter 2009 18.87%
Worst Quarter: 4th Quarter 2008 (26.72)%

Performance Table
Average Annual Total Returns
(For periods ended December 31, 2015)

	<i>One Year</i>	<i>Five Years</i>	<i>Since Inception of the Fund (5/3/06)</i>
Return before taxes	(6.53)%	5.36%	2.43%
Return after taxes on distributions	(6.53)%	5.36%	2.36%
Return after taxes on distributions and sale of Fund shares	(3.70)%	4.18%	1.89%
S&P 500® Index	1.38%	12.57%	6.99%

The S&P 500® Index is an unmanaged market capitalization-weighted index of 500 of the largest capitalized U.S. domiciled companies. Index returns assume reinvestment of dividends. Unlike the Fund’s returns, however, index returns do not reflect any fees or expenses. An investor cannot invest directly in an index.

After-tax returns are calculated using the highest historical individual federal marginal income tax rate and do not reflect the impact of state and local taxes. Actual after-tax returns depend on a shareholder’s tax situation and may differ from those shown. The after-tax returns are not relevant if you hold your Fund shares in tax-deferred arrangements, such as 401(k) plans or individual retirement accounts (“IRA”).

Investment Adviser: Biondo Investment Advisors, LLC is the Fund's investment adviser.

Investment Adviser Portfolio Managers: Joseph R. Biondo and Joseph P. Biondo are each co-portfolio managers. Both portfolio managers have served the Fund in their respective capacity since it commenced operations in 2006. Both portfolio managers are jointly and primarily responsible for the day-to-day management of the Fund.

Purchase and Sale of Fund Shares: You may purchase and redeem shares of the Fund on any day that the New York Stock Exchange is open for trading. The minimum initial investment in the Fund is \$1,000 for regular accounts (\$500 for retirement plans and automatic investment plans) and the minimum subsequent investment is \$100. Redemption requests may be made in writing, by telephone, or through a financial intermediary and will be paid by ACH, check or wire transfer.

Tax Information: Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-deferred plan such as an IRA or 401(k) plan.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT PRINCIPAL INVESTMENT STRATEGIES AND RELATED RISKS

Investment Objective: The Fund's investment objective is capital appreciation. The Fund's investment objective is a non-fundamental policy and may be changed by the Board of Trustees upon 60 days' written notice to shareholders.

Principal Investment Strategies: The Fund's adviser seeks to achieve the Fund's investment objective by investing primarily in a diversified portfolio of equity securities of companies that the adviser believes have above-average future growth potential relative to their peers. The Fund will invest in companies of all sizes traded on any stock exchange in the United States ("Universe"). The Universe is not limited by market capitalization or industry segmentation, but may include large-, mid-, small- and micro- cap sectors. The Fund may, from time to time, invest in fixed income securities to preserve capital while seeking yield or if the adviser believes the equity markets are over-valued. Fixed income securities will primarily consist of government and corporate bonds that are above investment grade. The Fund may invest in other investment companies including exchange-traded funds (ETFs) and, occasionally, open-end mutual funds and closed-end funds (together with ETFs, the "Underlying Funds"). The adviser will invest in Underlying Funds when it wishes the Fund to have representation in a certain sector or region but cannot uncover an individual company that meets its investment criteria. The Fund may also employ leverage, including bank borrowing, of up to 33% of the Fund's assets (defined as net assets plus borrowing) for investment purposes.

The adviser selects equity securities based on fundamental, bottom up research. These equity securities consist of common stocks and securities having the characteristics of common stocks that are issued by companies with consistent records of financial performance and strong management teams. Other factors that influence investment decisions include economic and technical analysis. The Fund will invest primarily in domestic companies, but also may invest in securities of foreign issuers.

The Fund will typically have 20-40 equity investments at any time; however, from time to time, there may be more or less than this range. The adviser looks for some of the following characteristics in a company:

- Quality management with direct ownership
- Market leadership
- Strong investment in research & development
- High barriers to entry, including patents, distribution systems, etc.
- New product innovation
- Recurring revenues from disposable products or demand
- Consistent record of financial performance
- Above average expected growth rates in revenues and earnings
- Superior corporate governance
- Attractive valuation

The adviser generally looks at a three-year investment horizon when initially committing to an equity position and then re-evaluates constantly, which can either shorten or lengthen the time horizon. This investment philosophy is geared towards companies that will be able to grow earnings and revenues for long-term stock appreciation. The adviser attempts to control risk by overall asset allocation, industry diversification and by conducting valuation analysis to avoid overpayment for a security. If the adviser believes the overall market is overvalued, it has the discretion to move a portion of the Fund's assets into fixed income securities, in order to take a more defensive position. The adviser seeks to diversify across different industries in order to minimize industry specific risk. The adviser conducts valuation analysis on a specific security basis. The adviser conducts an in-depth valuation analysis in order to determine what the fair value of a company is. This includes, but is not limited to, price-to-earnings ratio analysis and discounted cash-flow analysis. When conducting price-to-earnings ratio analysis, the adviser compares a specific company to its peers, to the market in general, and to its own historical valuation. The adviser seeks to assign a value to a specific security and to purchase those securities that have the most attractive disparities between current price and the adviser's projected price. In general, the advisor buys securities that it believes are undervalued and sells a security if its price target is achieved, if the fundamentals have deteriorated or if, in the opinion of the advisor, the security is no longer attractive for investment purposes. The advisor sells short securities that it believes are overvalued or to hedge Fund investments and buys back (covers) these securities if their price target is achieved or the advisor believes the security is no longer attractive for short-sale investment purposes.

Although equity securities of U.S. issuers are the Fund's primary investments, the Fund may invest in the types of securities and employ the types of investment strategies described below. For a more complete description of these and other investments and techniques, see the Fund's Statement of Additional Information ("SAI"). Additional information about these investments and the special risk factors that apply to them can be found under the title "Types of Investments" and in the SAI.

Depository Receipts: The Fund may invest in sponsored and unsponsored American Depositary Receipts ("ADRs"), which are receipts issued by an American bank or trust company evidencing ownership of underlying securities issued by a foreign issuer. ADRs, in registered form, are designed for use in U.S. securities markets. Unsponsored ADRs may be created without the participation of the foreign issuer. Holders of these ADRs generally bear all the costs of the ADR facility, whereas foreign issuers typically bear certain costs in a sponsored ADR. The bank or trust company depository of an unsponsored ADR may be under no obligation to distribute shareholder communications received from the foreign issuer or to pass through voting rights.

Fixed Income Securities: The Fund may also invest in fixed income or debt securities. The Fund may invest up to 20% of its total assets, measured at the time of investment, in fixed-income or debt securities with a quality of investment grade.

Other Investment Companies: The Fund also may invest in other investment companies, such as open-end investment companies (commonly known as "mutual funds"), closed-end investment companies ("closed end funds") and ETFs, that are not affiliated with the Trust (the "Underlying Funds"). The adviser selects specific Underlying Funds for investment as part of a strategy to gain exposure to certain segments of the market. The adviser will consider the Underlying Funds' investment goals and strategies, their investment advisers and portfolio managers, and their past performance (absolute, relative and risk-adjusted). The adviser also will consider other factors in the selection of Underlying Funds, such as fund size, liquidity, expense ratio, quality of shareholder service, reputation and tenure of portfolio manager, relative performance of the portfolio manager, general composition of its investment portfolio and current and expected portfolio holdings. Some of the underlying funds in which the Fund invests may not share the same investment objectives and investment limitations as the Fund. Under normal market conditions, investing in Underlying Funds will not be a principal part of the Fund's strategy.

Derivatives: The Fund may use derivative instruments, including futures, options, forward contracts and swaps. Derivative instruments are financial contracts, the value of which is based on an underlying security, a currency exchange rate, an interest rate or market index. Futures contracts and forward contracts commit the parties to a transaction at a time in the future at a price determined when the transaction is initiated. Futures contracts differ from forward contracts in that they are traded through regulated exchanges and are "marked to market" daily. Options differ from forward and futures contracts in that the buyer of the option has no obligation to perform under the contract. In a standard "swap" transaction, two parties agree to exchange the returns (or differentials in rates of returns) earned or realized on particular predetermined investments or instruments. Derivatives involve special risks, which are discussed below under Principal Risks.

Options: The Fund may write (i.e., sell) covered call options on securities that it owns. A call option is a contract that provides the holder or buyer of the option the right (not the obligation) to purchase the underlying securities from the Fund at a fixed price. A call option is covered if the Fund (a) owns the underlying security that is subject to the call; or (b) has an absolute or immediate right to acquire that security without additional cash consideration upon conversion or exchange of other securities held in its portfolio. Premiums received on the sale of such options (without regard to whether or not the option is exercised) are expected to enhance the income of the Fund beyond what would be realized on the underlying securities alone.

Net gains from the Fund's option strategy generally will be short-term capital gains which, for federal income tax purposes, will constitute investment company taxable income that, to the extent distributed, will be taxable to shareholders at rates applicable to ordinary income, rather than at lower rates that are applicable to long-term capital gains and certain qualifying dividends.

In addition, the Fund may purchase call options that are not "covered" to gain exposure to the underlying securities or securities indexes and may purchase put options on securities or securities indexes to hedge against potential declines in the market.

The Fund will typically sell an equity security when a call option is exercised or the fundamental reason that the security was purchased no longer exists. Securities may also be sold when the adviser believes the security has reached its appreciation potential, or when a company's fundamentals are deteriorating.

Short Sales: The value of the Fund's short positions may equal up to 20% of its net assets. A short sale consists of selling borrowed shares in the hope that they can be bought back later at a lower price. The Fund may be required to pay a fee to borrow the security and to pay over to the lender any payments received on the security. If the price of the security sold short increases between the time of the short sale and the time the Fund replaces the borrowed security, the Fund will incur a loss; conversely, if the price declines, the Fund will realize a capital gain. Although the Fund's gain is limited by the price at which it sold the security short, its potential loss is unlimited. The more a Fund pays to purchase the security, the more it will lose on the transaction, and the more the price of Fund shares will be affected. The Fund will also incur costs to engage in this practice.

Principal Investment Risks: *As with all mutual funds, there is a risk that you could lose money through your investment in the Fund. Although the Fund will strive to meet its objective, there is no assurance that it will.*

- **Equity Risk:** The net asset value of the Fund will fluctuate based on changes in the value of the equity securities held by the Fund or Underlying Funds that invest in U.S. and/or foreign equity securities. Equity prices can fall rapidly in response to developments affecting a specific company or industry, or to changing economic, political or market conditions.
 - **Growth Stock Risk:** Investors often expect growth companies to increase their earnings at a certain rate. If these expectations are not met, investors can punish the stocks inordinately, even if earnings do increase. In addition, growth stocks typically lack the dividend yield that can cushion stock prices in market downturns.
 - **Small and Medium Issuer Risk:** Investments in Underlying Funds that own small and medium capitalization companies and direct investments in individual small and medium capitalization companies may be more vulnerable than larger, more established organizations to adverse business or economic developments. In particular, small capitalization companies may have limited product lines, markets, and financial resources and may be dependent upon a relatively small management group. These securities may trade over-the-counter or listed on an exchange and may or may not pay dividends.
 - **Stock Market Volatility:** Stock markets are volatile and there is a risk that the price of a security will rise or fall due to changing economic, political or market conditions, as well as company-specific factors. Consequently, the value of your investment in the Fund will go up and down, which means that you could lose money. The Fund's investments in High Beta Index Funds may increase its exposure to stock market volatility.
 - **Value Stock Risk:** Value stocks involve the risk that they may never reach what the investment adviser believes is their full market value, either because the market fails to recognize the stock's intrinsic worth or the adviser misgauged that worth. They also may decline in price, even though, in theory, they are already undervalued. Because different types of stocks tend to shift in and out of favor depending on market and economic conditions, the Fund's performance may sometimes be lower or higher than that of other types of funds (such as those emphasizing growth stocks).
- **Fixed Income Risk:** When the Fund invests in fixed income securities or derivatives, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities or derivatives owned by the Fund. In general, the market price of debt securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. Other risk factors include credit risk (the debtor may default) and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). These risks could affect the value of a particular investment by the Fund possibly causing the Fund's share price and total return to be reduced and fluctuate more than other types of investments.

- *Foreign Investment Risk:* The Fund could be subject to greater risks because the Fund's performance may depend on factors other than the performance of securities of U.S. issuers. Changes in foreign economies and political climates are more likely to affect the Fund than a mutual fund that invests exclusively in U.S. dollars and U.S. Issuers. The value of foreign currency denominated securities or foreign currency contracts is also affected by the value of the local currency relative to the U.S. dollar. There may also be less government supervision of foreign markets, resulting in non-uniform accounting practices and less publicly available information about issuers of foreign currency denominated securities. The value of foreign investments, including foreign currency denominated investments, may be affected by changes in exchange control regulations, application of foreign tax laws (including withholding tax), changes in governmental administration or economic or monetary policy (in this country or abroad) or changed circumstances in dealings between nations. In addition, foreign brokerage commissions, custody fees and other costs of investing in foreign securities are generally higher than in the United States. Investments in foreign issues, whether denominated in U.S. dollars or foreign currencies, could be affected by other factors not present in the United States, including expropriation, armed conflict, confiscatory taxation, and potential difficulties in enforcing contractual obligations.
- *Leveraging Risk:* The use of leverage, such as borrowing money to purchase securities, investing in call options and short selling will magnify the Fund's gains or losses. The use of leverage may also cause the Fund to have higher expenses (especially interest and dividend expenses) than those of equity mutual funds that do not use such techniques. The use of leverage may cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations.
- *Management Risk:* The adviser's dependence on technical and fundamental models and judgments about the attractiveness, value and potential appreciation of particular asset classes, securities and Underlying Funds in which the Fund invests may prove to be incorrect and may not produce the desired results. If the adviser's assessment of a company's potential is not correct, the securities in the Fund may decrease in value. The actively managed nature of the Fund increases this security selection risk. Additionally, the value of the Fund's shares, like company stock prices generally, will fluctuate within a wide range. The ability of the Fund to meet its investment objective is directly related to the adviser's allocation of the Fund's assets using technical and fundamental models.
- *Non-Diversification Risk:* As a non-diversified fund, the Fund may invest more than 5% of its total assets in the securities of one or more issuers. The Fund may also invest in Underlying Funds that are non-diversified. Because a relatively high percentage of the assets of the Fund may be invested in the securities of a limited number of issuers, the value of shares of the Fund may be more sensitive to any single economic, business, political or regulatory occurrence than the value of shares of a diversified investment company. This fluctuation, if significant, may affect the performance of the Fund.
- *Prepayment Risk:* Certain types of debt securities, such as mortgage-backed securities, have yield and maturity characteristics corresponding to underlying assets. Unlike traditional debt securities, which may pay a fixed rate of interest until maturity when the entire principal amount comes due, payments on certain mortgage-backed securities may include both interest and a partial payment of principal. Besides the scheduled repayment of principal, payments of principal may result from the voluntary prepayment, refinancing, or foreclosure of the underlying mortgage loans.

Securities subject to prepayment are less effective than other types of securities as a means of "locking in" attractive long-term interest rates. One reason is the need to reinvest prepayments of principal; another is the possibility of significant unscheduled prepayments resulting from declines in interest rates. These prepayments would have to be reinvested at lower rates. As a result, these securities may have less potential for capital appreciation during periods of declining interest rates than other securities of comparable maturities, although they may have a similar risk of decline in market value during periods of rising interest rates. Prepayments may also significantly shorten the effective maturities of these securities, especially during periods of declining interest rates. Conversely, during periods of rising interest rates, a reduction in prepayments may increase the effective maturities of these securities, subjecting them to a greater risk of decline in market value in response to rising interest rates than traditional debt securities, and, therefore, potentially increasing the volatility of the Fund.

At times, some of the mortgage-backed securities in which the Fund may invest will have higher than market interest rates and, therefore, will be purchased at a premium above their par value. Prepayments may cause losses in securities purchased at a premium, as unscheduled prepayments, which are made at par, will cause the Fund to experience a loss equal to any unamortized premium.

- *Underlying Funds Risk:* The Fund invests in ETFs, mutual funds and closed-end funds. As a result, your cost of investing in a Fund will be higher than the cost of investing directly in ETFs, mutual funds and closed-end funds and may be higher than other mutual funds that invest directly in stocks and bonds. You will indirectly bear fees and expenses charged by the Underlying Funds in addition to the Fund's direct fees and expenses. Additional risks of investing in ETFs, mutual funds and closed-end funds, where noted, are described below:

- **Strategies Risk:** Each Underlying Fund is subject to specific risks, depending on the nature of the fund. These risks could include liquidity risk, sector risk, and foreign currency risk, as well as risks associated with fixed income securities and commodities.
- **ETF Tracking Risk:** Investment in the Fund should be made with the understanding that the ETFs in which the Fund invests will not be able to replicate exactly the performance of the indices they track because the total return generated by the securities will be reduced by transaction costs incurred in adjusting the actual balance of the securities. In addition, the ETFs in which the Fund invests will incur expenses not incurred by their applicable indices. Certain securities comprising the indices tracked by the ETFs may, from time to time, temporarily be unavailable, which may further impede the ETFs' ability to track their applicable indices.
- **Risk Related to Net Asset Value and Market Price:** The market value of the ETF and closed-end shares may differ from their net asset value. This difference in price may be due to the fact that the supply and demand in the market for fund shares at any point in time is not always identical to the supply and demand in the market for the underlying basket of securities. Accordingly, there may be times when shares trades at a premium or discount to net asset value.
- **Expense Risk:** The Fund invests in Underlying Funds. As a result, your cost of investing in the Fund will be higher than the cost of investing directly in ETF, mutual fund and closed-end fund shares and may be higher than other mutual funds that invest directly in stocks and bonds. You will indirectly bear fees and expenses charged by the Underlying Funds in addition to the Fund's direct fees and expenses.
- **Additional Risk:** The strategy of investing in Underlying Funds could affect the timing, amount and character of distributions to you and therefore may increase the amount of taxes you pay. In addition, certain prohibitions on the acquisition of mutual fund shares by the Fund may prevent the Fund from allocating investments in the manner the adviser considers optimal.

Temporary Investments: To respond to adverse market, economic, political or other conditions, the Fund may invest 100% of its total net assets, without limitation, in high-quality short-term debt securities and money market instruments. These short-term debt securities and money market instruments include shares of other mutual funds, commercial paper, certificates of deposit, bankers' acceptances, U.S. Government securities and repurchase agreements. While the Fund is in a defensive position, the opportunity to achieve its investment objective will be limited. Furthermore, to the extent that the Fund invests in money market mutual funds for its cash position, there will be some duplication of expenses because the Fund would bear its pro rata portion of such money market funds' advisory fees and operational fees.

Portfolio Holdings Disclosure: A description of the Fund's policies regarding the release of portfolio holdings information is available in the Fund's Statement of Additional Information. The Fund will post a list of its holdings on the Adviser's website at www.thebiondogroup.com thirty (30) days after each month end. Shareholders may request portfolio holdings schedules at no charge by calling 1-800-672-9152.

Cybersecurity: The computer systems, networks and devices used by the Fund and its service providers to carry out routine business operations employ a variety of protections designed to prevent damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches. Despite the various protections utilized by the Fund and its service providers, systems, networks, or devices potentially can be breached. The Fund and its shareholders could be negatively impacted as a result of a cybersecurity breach.

Cybersecurity breaches can include unauthorized access to systems, networks, or devices; infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. Cybersecurity breaches may cause disruptions and impact the Fund's business operations, potentially resulting in financial losses; interference with the Fund's ability to calculate its NAV; impediments to trading; the inability of the Fund, the Adviser, and other service providers to transact business; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs; as well as the inadvertent release of confidential information.

Similar adverse consequences could result from cybersecurity breaches affecting issuers of securities in which the Fund invests; counterparties with which the Fund engages in transactions; governmental and other regulatory authorities; exchange and other financial market operators, banks, brokers, dealers, insurance companies, and other financial institutions (including financial intermediaries and service providers for the Fund's shareholders); and other parties. In addition, substantial costs may be incurred by these entities in order to prevent any cybersecurity breaches in the future.

MANAGEMENT

Investment Adviser: Biondo Investment Advisors, LLC, located at 540 Routes 6 & 209, PO Box 909, Milford, Pennsylvania 18337, serves as investment adviser to the Fund and is registered as an investment adviser with the Securities and Exchange Commission. The adviser has been in operation since April of 2004. Subject to the authority of the Board of Trustees of the Trust, the adviser is responsible for the overall management of the Fund's business affairs.

Under the terms of the Investment Advisory Agreement (the "Agreement") between the Trust and the adviser, the adviser conducts investment research and management for the Fund and is responsible for the purchase and sale of securities for the Fund's portfolio. The adviser provides the Fund with investment advice, supervises the Fund's management and investment programs, and provides investment advisory facilities and executive and supervisory personnel for managing the investments and effectuating portfolio transactions. The adviser also furnishes, at its own expense, all necessary administrative services, office space, equipment and clerical personnel for servicing the investments of the Fund. A discussion regarding the basis for the Board's renewal of the Investment Advisory Agreement of the Fund is available in the Fund's Annual Report to Shareholders dated December 31, 2015. Pursuant to the Agreement, the Fund pays the adviser a management fee equal to 1.00% of the average daily net assets of the Fund. During the fiscal year ended December 31, 2015, the adviser earned management fees equal to 0.78% of the average net assets of the Fund after fee waivers.

The adviser has contractually agreed to waive its management fees and/or to make payments to limit Fund expenses, other than extraordinary or non-recurring expenses, at least until April 30, 2017, so that the annual operating expenses (excluding any front-end or contingent deferred loads, brokerage fees and commissions, acquired fund fees and expenses, fees and expenses associated with instruments in other collective investment vehicles or derivative instruments (including for example options and swap fees and expenses), borrowing costs (such as interest and dividend expense on securities sold short), taxes, and extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees and contractual indemnification of Fund service providers (other than the adviser)) of the Fund do not exceed 1.50% of the Fund's average daily net assets. Waivers and expense payments may be recouped by the adviser from the Fund, to the extent that overall expenses fall below the specified limits, within three years after the end of the fiscal period during which the amounts were waived or paid. Fee waiver and reimbursement arrangements can decrease the Fund's expenses and boost its performance.

Portfolio Managers: The following portfolio managers are jointly and primarily responsible for the day-to-day management of the Fund. Each portfolio manager has managed the Fund since its inception.

Joseph R. Biondo

Joseph (Joe) R. Biondo Founder and Senior Portfolio Manager of Biondo Investment Advisors, LLC, began his career in financial services with Loeb Rhoades, Inc., a predecessor firm of Smith Barney. He began managing portfolios in 1991 at Smith Barney before forming Biondo Investment Advisors, LLC in 2004. As Portfolio Manager and key member of the investment team, Joe brings in-depth experience and expertise to managing clients' portfolios. He is a graduate of the New York Institute of Finance. Joe serves as an Honorary Trustee for Avon Old Farms School, a Director of the Newton Memorial Hospital Foundation and as the Chairman of The Ingeborg A. Biondo Memorial Foundation.

Joseph P. Biondo

Joseph P. Biondo, Chief Executive Officer, Chief Investment Officer and Portfolio Manager, began his career with Prudential Securities in 1997. In 1999 he joined the Biondo team managing assets at Smith Barney. In 2004, he became a partner in Biondo Investment Advisors, LLC. He leads the firm's Investment Committee and oversees the Equity Research team. Joseph graduated from The Wharton School at the University of Pennsylvania earning a degree in Economics with concentrations in Entrepreneurial Management, Finance and Marketing. He served as the National Family Teams Co-Chair for the 2013 March for Babies sponsored by the March of Dimes. Joseph is also a Director of the Ingeborg A. Biondo Memorial Foundation, the President of the Board for Center for Developmental Disabilities, and a member of the Pope John High School Endowment Committee.

The Fund's Statement of Additional Information provides additional information about the portfolio managers' compensation structure, other accounts managed by the portfolio managers, and the portfolio managers' ownership of Fund shares.

HOW SHARES ARE PRICED

The net asset value (“NAV”) and offering price (NAV plus any applicable sales charges) of Fund shares is determined as of the close of the New York Stock Exchange (“NYSE”) (normally 4:00 p.m. Eastern Time) on each day the NYSE is open for business. The NYSE is closed on weekends and New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The NAV is determined by dividing the value of the Fund’s securities, cash and other assets, minus all expenses and liabilities, by the number of shares outstanding. The NAV takes into account the expenses and fees of the Fund, including management, administration, and distribution fees, which are accrued daily. The determination of NAV for a particular day is applicable to all applications for the purchase of shares, as well as all requests for the redemption of shares, received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of trading on the NYSE on that day.

Generally, securities are valued each day at the last quoted sales price on each security’s principal exchange. Securities traded or dealt in on one or more securities exchanges (whether domestic or foreign) for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. Securities primarily traded in the National Association of Securities Dealers’ Automated Quotation System (“NASDAQ”) National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. If market quotations are not readily available, securities will be valued at their fair market value as determined in good faith in accordance with procedures approved by the Board, and evaluated by the Board quarterly as to the reliability of the fair value method used. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security may be materially different than the value that could be realized upon the sale of that security. The fair value prices can differ from market prices when they become available or when a price becomes available. The Board has delegated execution of these procedures to a fair value team composed of one or more representatives from each of the (i) Trust, (ii) administrator, and (iii) Adviser. The team may also enlist third party consultants such as an audit firm or financial officer of a security issuer on an as-needed basis to assist in determining a security-specific fair value. The Board reviews and ratifies the execution of this process and the resultant fair value prices at least quarterly to assure the process produces reliable results.

The Fund may use independent pricing services to assist in calculating the value of the Fund’s securities. In addition, market prices for foreign securities are not determined at the same time of day as the NAV for the Fund. Because the Fund may invest in underlying ETFs which hold portfolio securities primarily listed on foreign exchanges, and these exchanges may trade on weekends or other days when the underlying ETFs do not price their shares, the value of some of the Fund’s portfolio securities may change on days when you may not be able to buy or sell Fund shares. In computing the NAV, the Fund values foreign securities held by the Fund at the latest closing price on the exchange in which they are traded immediately prior to closing of the NYSE. Prices of foreign securities quoted in foreign currencies are translated into U.S. dollars at current rates. If events materially affecting the value of a security in the Fund’s portfolio, particularly foreign securities, occur after the close of trading on a foreign market but before the Fund prices its shares, the security will be valued at fair value. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the adviser may need to price the security using the Fund’s fair value pricing guidelines. Without a fair value price, short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund’s portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund’s NAV by short-term traders. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the prices used by other mutual funds to determine net asset value, or from the price that may be realized upon the actual sale of the security.

With respect to any portion of the Fund’s assets that are invested in one or more open-end management investment companies registered under the 1940 Act, each Fund’s net asset value is calculated based upon the net asset values of those open-end management investment companies, and the prospectuses for these companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

HOW TO PURCHASE SHARES

Purchasing Shares: The Fund may not be available for purchase in all states. You may purchase shares of the Fund by sending a completed application form to the following address by either regular or overnight mail:

via Regular Mail
The Biondo Growth Fund
c/o Gemini Fund Services, LLC
P.O. Box 541150
Omaha, Nebraska 68154

or Overnight Mail
The Biondo Growth Fund
c/o Gemini Fund Services, LLC
17605 Wright Street, Suite 2
Omaha, Nebraska 68130

The USA PATRIOT Act requires financial institutions, including the Fund, to adopt certain policies and programs to prevent money-laundering activities, including procedures to verify the identity of customers opening new accounts. As requested on the application, you should supply your full name, date of birth, social security number and permanent street address. Mailing addresses containing a P.O. Box will not be accepted. This information will assist the Fund in verifying your identity. Until such verification is made, the Fund may temporarily limit additional share purchases. In addition, the Fund may limit additional share purchases or close an account if it is unable to verify a shareholder's identity. As required by law, the Fund may employ various procedures, such as comparing the information to fraud databases or requesting additional information or documentation from you, to ensure that the information supplied by you is correct.

Purchase through Brokers: You may invest in the Fund through brokers or agents who have entered into selling agreements with the Fund's distributor. These brokers and agents are authorized to designate other intermediaries to receive purchase and redemption orders on behalf of the Fund. Such brokers are authorized to designate other intermediaries to receive purchase and redemption orders on the fund's behalf. The Fund will be deemed to have received a purchase or redemption order when an authorized broker or its designee receives the order. The broker or agent may set its own initial and subsequent investment minimums. You may be charged a fee if you use a broker or agent to buy or redeem shares of the Fund. Finally, various servicing agents use procedures and impose restrictions that may be in addition to, or different from those applicable to investors purchasing shares directly from the Fund. You should carefully read the program materials provided to you by your servicing agent.

Purchase by Wire: If you wish to wire money to make an investment in the Fund, please call the Fund at 1-800-672-9152 for wiring instructions and to notify the Fund that a wire transfer is coming. Any commercial bank can transfer same-day funds via wire. The Fund will normally accept wired funds for investment on the day received if they are received by the Fund's designated bank before the close of regular trading on the NYSE. Your bank may charge you a fee for wiring same-day funds.

Automatic Investment Plan: You may participate in the Fund's Automatic Investment Plan, an investment plan that automatically debits money from your bank account and invests it in the Fund through the use of electronic funds transfers or automatic bank drafts. You may elect to make subsequent investments by transfers of a minimum of \$50 on specified days of each month into your established Fund account. Please contact the Fund at 1-800-672-9152 for more information about the Fund's Automatic Investment Plan.

Minimum and Additional Investment Amounts: The minimum initial investment to open an account is \$1,000 for regular accounts and \$500 for retirement plans and automatic investment plans. The minimum subsequent investment is \$100. Lower minimum initial and additional investments may also be applicable in certain other circumstances, including purchases by certain tax deferred retirement programs. There is no minimum investment requirement when you are buying shares by reinvesting dividends and distributions from the Fund.

The Fund, however, reserves the right, in its sole discretion, to reject any application to purchase shares. Applications will not be accepted unless they are accompanied by a check drawn on a U.S. bank, savings and loan, or credit union in U.S. funds for the full amount of the shares to be purchased. After you open an account, you may purchase additional shares by sending a check together with written instructions stating the name(s) on the account and the account number, to the above address. Make all checks payable to "**The Biondo Growth Fund.**" The Fund will not accept payment in cash, including cashier's checks or money orders. Also, to prevent check fraud, the Fund will not accept third party checks, U.S. Treasury checks, credit card checks or starter checks for the purchase of shares.

Note: Gemini Fund Services, LLC ("GFS" or "Transfer Agent"), the Fund's transfer agent, will charge a \$25 fee against a shareholder's account, in addition to any loss sustained by the Fund, for any payment check returned to the Transfer Agent for insufficient funds.

When Order is Processed: All shares will be purchased at the NAV per share next determined after the Fund receives your application or request in good order. All requests received in good order by the Fund before 4:00 p.m. (Eastern time) will be executed on that same day. Requests received after 4:00 p.m. will be processed on the next business day.

Good Order: When making a purchase request, make sure your request is in good order. “Good Order” means your purchase request includes:

- the *name* of the Fund,
- the *dollar* amount of shares to be purchased,
- a completed purchase application or investment stub, and
- check payable to “The Biondo Growth Fund”.

Retirement Plans: You may purchase shares of the Fund for your individual retirement plans. Please call the Fund at 1-800-672-9152 for the most current listing and appropriate disclosure documentation on how to open a retirement account.

HOW TO REDEEM SHARES

Redeeming Shares: You may redeem all or any portion of the shares credited to your accounts by submitting a written request for redemption to:

via Regular Mail
The Biondo Growth Fund
c/o Gemini Fund Services, LLC
P.O. Box 541150
Omaha, Nebraska 68154

or Overnight Mail
The Biondo Growth Fund
c/o Gemini Fund Services, LLC
17605 Wright Street, Suite 2
Omaha, Nebraska 68130

Redeeming by Telephone: The telephone redemption privilege is automatically available to all new accounts except retirement accounts. If you do not want the telephone redemption privilege, you must indicate this in the appropriate area on your account application or you must write to the Fund and instruct it to remove this privilege from your account.

The proceeds will be sent by mail to the address designated on your account or wired directly to your existing account in any commercial bank or brokerage firm in the United States as designated on your application. To redeem by telephone, call 1-800-672-9152. The redemption proceeds normally will be sent by mail or by wire within three business days after receipt of your telephone instructions. IRA accounts are not redeemable by telephone.

The Fund reserves the right to suspend the telephone redemption privileges with respect to your account if the name(s) or the address on the account has been changed within the previous 30 days. Neither the Fund, GFS, nor their respective affiliates will be liable for complying with telephone instructions they reasonably believe to be genuine or for any loss, damage, cost or expenses in acting on such telephone instructions and you will be required to bear the risk of any such loss. The Fund or GFS, or both, will employ reasonable procedures to determine that telephone instructions are genuine. If the Fund and/or GFS do not employ these procedures, they may be liable to you for losses due to unauthorized or fraudulent instructions. These procedures may include, among others, requiring forms of personal identification prior to acting upon telephone instructions, providing written confirmation of the transactions and/or tape recording telephone instructions.

Redeeming through Broker: If shares of the Fund are held by a broker-dealer, financial institution or other servicing agent, you must contact that servicing agent to redeem shares of the Fund. The servicing agent may charge a fee for this service.

Redemption by Wire: You may request your redemption by wire transfer, you will be required to pay a \$15.00 wire transfer fee to GFS to cover costs associated with the transfer but GFS does not charge a fee when transferring redemption proceeds by electronic funds transfer. In addition, your bank may impose a charge for receiving wires.

Systematic Withdrawal Plan: If your individual account, IRA or other qualified plan account has a current account value of at least \$10,000, you may adopt a Systematic Withdrawal Plan to provide for monthly, quarterly or other periodic checks for any designated amount of \$500 or more. If you wish to open a Systematic Withdrawal Plan, please indicate on your application or contact the Fund at 1-800-672-9152.

Redemptions in Kind: The Fund reserves the right to honor requests for redemption or repurchase orders by making payment in whole or in part in readily marketable securities (“redemption in kind”) if the amount of such a request is greater than \$250,000 or 1% of the Fund’s assets. The securities will be chosen by the Fund and valued using the Fund’s NAV procedures. A shareholder may incur transaction expenses in converting these securities to cash.

When Redemptions are Sent: Once the Fund receives your redemption request in “good order” as described below, it will issue a check based on the next determined NAV following your redemption request. If you purchase shares using a check and soon after request a redemption, your redemption request will not be processed until the check used for your purchase has cleared.

Good Order

Your redemption request will be processed if it is in “good order”. To be in good order, the following conditions must be satisfied:

- The request should be in writing, indicating the number of shares or dollar amount to be redeemed;
- The request must identify your account number;
- The request should be signed by you and any other person listed on the account, exactly as the shares are registered; and
- If you request the redemption proceeds to be sent to a person, bank or an address other than that of record, or if the proceeds of a requested redemption exceed \$100,000, the signature(s) on the request must be medallion signature guaranteed by an eligible signature guarantor.

When You Need Medallion Signature Guarantees: If you wish to change the bank or brokerage account that you have designated on your account, you may do so at any time by writing to the Fund with your signature guaranteed. A medallion signature guarantee assures that a signature is genuine and protects you from unauthorized account transfers. You will need your signature guaranteed if:

- you wish to change the bank or brokerage account that you have designated on your account;
- you request a redemption to be made payable to a person not on record with the Fund;
- you request that a redemption be mailed to an address other than that on record with the Fund;
- the proceeds of a requested redemption exceed \$100,000;
- any redemption is transmitted by federal wire transfer to a bank other than the bank of record; or
- your address was changed within 30 days of your redemption request.

Signatures may be guaranteed by any eligible guarantor institution (including banks, brokers and dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations). Further documentation will be required to change the designated account if shares are held by a corporation, fiduciary or other organization. *A notary public cannot guarantee signatures.*

Retirement Plans: If you own an IRA or other retirement plan, you must indicate on your redemption request whether the Trust should withhold federal income tax. Unless you elect in your redemption request that you do not want to have federal tax withheld, the redemption will be subject to withholding.

Redemption Fee: For shares held less than 30 days, the Fund will deduct a 2% redemption fee on your redemption amount if you sell your shares. Shares held longest will be treated as being redeemed first and shares held shortest as being redeemed last. The redemption fee does not apply to shares that were acquired through reinvestment of distributions. Shares held for 30 days or more are not subject to the 2% fee. Redemption fees are paid to the Fund directly and are designed to offset costs associated with fluctuations in Fund asset levels and cash flow caused by short-term shareholder trading.

Low Balances: If at any time your account balance falls below \$1,000 (\$500 for retirement accounts), the Fund may notify you that, unless the account is brought up to at least \$1,000 (\$500 for retirement accounts) within 30 days of the notice, your account could be closed. After the notice period, the Fund may redeem all of your shares and close your account by sending you a check to the address of record. Your account will not be closed if the account balance drops below \$1,000 (\$500 for retirement accounts) due to a decline in NAV.

Exchanging Shares: An exchange involves the redemption of all or a portion of the shares of one fund and the purchase of shares of another fund. You may exchange all or a portion of your investment from the Biondo Growth Fund, which is offered by a separate prospectus, to the Biondo Focus Fund, or vice versa. Any new account established through an exchange will be subject to the minimum investment requirements described above. Exchanges will be executed on the basis of the relative NAV of the shares exchanged. The exchange privilege may be exercised only in those states where the shares of the Fund being acquired legally may be sold.

An exchange is considered to be a sale of shares for federal income tax purposes on which you may realize a taxable gain or loss, but would not be subject to the Fund’s 2% redemption fee on shares exchanged within 30 days of purchase.

TAX STATUS, DIVIDENDS AND DISTRIBUTIONS

Any sale of the Fund's shares may generate tax liability (unless you are a tax-exempt investor or your investment is in a qualified retirement account). When you redeem your shares, you may realize a taxable gain or loss. This is measured by the difference between the proceeds of the sale and the tax basis for the shares you sold. (To aid in computing your tax basis, you generally should retain your account statements for the period that you hold shares in the Fund.)

The Fund intends to distribute substantially all of its net investment income and net capital gain annually in December. Both distributions will be reinvested in shares of the Fund unless you elect to receive cash. Dividends from net investment income (including any excess of net short-term capital gain over net long-term capital loss) are taxable to investors as ordinary income, while distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss) are generally taxable as long-term capital gain, regardless of your holding period for the shares. Any dividends or capital gain distributions you receive from the Fund will normally be taxable to you when made, regardless of whether you reinvest dividends or capital gain distributions or receive them in cash. Certain dividends or distributions declared in October, November or December will be taxed to shareholders as if received in December if they are paid during the following January. Each year the Fund will inform you of the amount and type of your distributions. IRAs and other qualified retirement plans are exempt from federal income taxation.

Your redemptions may result in a capital gain or loss for federal tax purposes. A capital gain or loss on your investment is the difference between the cost of your shares, including any sales charges, and the amount you receive when you sell them.

On the account application, you will be asked to certify that your social security number or taxpayer identification number is correct and that you are not subject to backup withholding for failing to report income to the IRS. If you are subject to backup withholding or you did not certify your taxpayer identification number, the IRS requires the Fund to withhold a percentage of any dividend or redemption proceeds. The Fund reserves the right to reject any application that does not include a certified social security or taxpayer identification number. If you do not have a social security number, you should indicate on the purchase form that your application to obtain a number is pending. The Fund is required to withhold taxes if a number is not delivered to the Fund within seven days.

This summary is not intended to be and should not be construed to be legal or tax advice to any current holder of the Fund's shares. You should consult your own tax advisers to determine the tax consequences of owning the Fund's shares.

FREQUENT PURCHASES AND REDEMPTION OF FUND SHARES

The Fund discourages and does not accommodate market timing. Frequent trading into and out of the Fund can harm all fund shareholders by disrupting the Fund's investment strategies, increasing Fund expenses, decreasing tax efficiency and diluting the value of shares held by long-term shareholders. The Fund is designed for long-term investors and is not intended for market timing or other disruptive trading activities. Accordingly, the Fund's Board has approved policies that seek to curb these disruptive activities while recognizing that shareholders may have a legitimate need to adjust their Fund investments as their financial needs or circumstances change. The Fund currently commits staff to review, on a continuing basis, recent trading activity in order to identify trading activity that may be contrary to the Fund's "Market Timing Trading Policy;" and assesses a redemption fee for short-term trading.

Though these methods involve judgments that are inherently subjective and involve some selectivity in their application, the Fund seeks to make judgments and applications that are consistent with the interests of the Fund's shareholders.

The redemption fee, which is uniformly imposed, is intended to discourage short-term trading and is paid to the Fund to help offset any cost associated with such short-term trading. The Fund will monitor the assessment of redemption fees against your account. Based on the frequency of redemption fees assessed against your account, the adviser or Transfer Agent may in its sole discretion determine that your trading activity is detrimental to the Fund as described in the Fund's Market Timing Trading Policy and elect to reject or limit the amount, number, frequency or method for requesting future purchases or exchanges into the Fund.

The Fund reserves the right to reject or restrict purchase requests for any reason, particularly when a shareholder's trading activity suggests that the shareholder may be engaged in market timing or other disruptive trading activities. Neither the Fund nor the adviser will be liable for any losses resulting from rejected purchase orders. The adviser may also bar an investor who has violated these policies (and the investor's financial adviser) from opening new accounts with the Fund.

Although the Fund attempts to limit disruptive trading activities, some investors use a variety of strategies to hide their identities and their trading practices. There can be no guarantee that the Fund will be able to identify or limit these activities. Omnibus account arrangements are common forms of holding shares of the Fund. While the Fund will encourage financial intermediaries to apply the Fund's Market Timing Trading Policy to their customers who invest indirectly in the Fund, the Fund is limited in its ability to monitor the trading activity or enforce the Fund's Market Timing Trading Policy with respect to customers of financial intermediaries. For example, should it occur, the Fund may not be able to detect market timing that may be facilitated by financial intermediaries or made difficult to identify in the omnibus accounts used by those intermediaries for aggregated purchases, exchanges, and redemptions on behalf of all their customers. More specifically, unless the financial intermediaries have the ability to apply the Fund's Market Timing Trading Policy to their customers through such methods as implementing short-term trading limitations or restrictions and monitoring trading activity for what might be market timing, the Fund may not be able to determine whether trading by customers of financial intermediaries is contrary to the Fund's Market Timing Trading Policy. However, the Fund will ensure that financial intermediaries maintaining omnibus accounts on behalf of the Fund enter into an agreement with the Fund to provide shareholder transaction information, to the extent known to the financial intermediary, to the Fund upon request. If the Fund or its transfer agent or shareholder servicing agent suspects there is market timing activity in the account, the Fund will seek full cooperation from the service provider maintaining the account to identify the underlying participant. At the request of the adviser, the service providers may take immediate action to stop any further short-term trading by such participants.

DISTRIBUTION OF SHARES

Distributor: Northern Lights Distributors, LLC, 17605 Wright Street, Omaha, Nebraska 68130, is the distributor for the shares of the Fund. Northern Lights Distributors, LLC is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). Shares of the Fund are offered on a continuous basis.

Distribution (12b-1) and Shareholder Servicing Fees: The Trust, with respect to the Fund, has adopted the Trust's Master Distribution and Shareholder Servicing Plan for Investor Class (the "Plan"), pursuant to Rule 12b-1 of the 1940 Act, which allows the Fund to pay the Fund's distributor an annual fee for distribution and shareholder servicing expenses of 0.25% of the Fund's average daily net. Because these fees are paid out of the Fund's assets on an on-going basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges.

The Fund's distributor and other entities are paid pursuant to the Plan for distribution and shareholders servicing provided and the expenses borne by the distributor and others in the distribution of Fund shares, including the payment of commissions for sales of the shares and incentive compensation to and expenses of dealers and others who engage in or support distribution of shares or who service shareholder accounts, including overhead and telephone expenses; printing and distribution of prospectuses and reports used in connection with the offering of the Fund's shares to other than current shareholders; and preparation, printing and distribution of sales literature and advertising materials. In addition, the distributor or other entities may utilize fees paid pursuant to the Plans to compensate dealers or other entities for their opportunity costs in advancing such amounts, which compensation would be in the form of a carrying charge on any un-reimbursed expenses.

You should be aware that if you hold your shares for a substantial period of time, you may indirectly pay more than the economic equivalent of the maximum front-end sales charge allowed by the FINRA due to the recurring nature of distribution (12b-1) fees.

Additional Compensation to Financial Intermediaries: The Distributor, its affiliates, and the Fund's adviser and its affiliates may each, at their own expense and out of their own legitimate profits, provide additional cash payments to financial intermediaries who sell shares of the Fund. Financial intermediaries include brokers, financial planners, banks, insurance companies, retirement or 401(k) plan administrators and others. These payments may be in addition to the Rule 12b-1 fees and any sales charges that are disclosed elsewhere in this Prospectus. These payments are generally made to financial intermediaries that provide shareholder or administrative services, or marketing support. Marketing support may include access to sales meetings, sales representatives and financial intermediary management representatives, inclusion of the Fund on a sales list, including a preferred or select sales list, or other sales programs. These payments also may be made as an expense reimbursement in cases where the financial intermediary provides shareholder services to Fund shareholders. The distributor may, from time to time, provide promotional incentives, including allowance and/or payment of up to the entire sales charge, to certain investment firms. Such incentives may, at the distributor's discretion, be limited to investment firms who allow their individual selling representatives to participate in such additional commissions.

Householding: To reduce expenses, we mail only one copy of the prospectus and each annual and semi-annual report to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents, please call the Fund at 1-877-350-8668 between the hours of 8:30 a.m. and 6:00 p.m. Eastern Time on days the Fund is open for business or contact your financial institution. We will begin sending you individual copies thirty days after receiving your request.

FINANCIAL HIGHLIGHTS

The financial highlights table is intended to help you understand the Fund's financial performance for the period of the Fund's operations. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information for the Fund has been derived from the financial statements audited by BBD, LLP, whose report along with the Fund's financial statements are included in the Fund's December 31, 2015 annual report, which is available upon request.

Per Share Data and Ratios for a Share of Beneficial Interest Outstanding Throughout Each Period

	Investor Class					
	Year Ended December 31, 2015	Year Ended December 31, 2014	Year Ended December 31, 2013	Period Ended December 31, 2012 *	Year Ended January 31, 2012	Period Ended January 31, 2011
Net asset value, beginning of period	\$ 13.17	\$ 12.38	\$ 8.94	\$ 8.90	\$ 9.72	\$ 8.50
Activity from investment operations:						
Net investment loss ⁽¹⁾	(0.11)	(0.11)	(0.08)	(0.07)	(0.11)	(0.09)
Net realized and unrealized gain (loss) on investments and option transactions	(0.75)	0.90	3.52	0.11	(0.71)	1.31
Total income (loss) from investment operations	(0.86)	0.79	3.44	0.04	(0.82)	1.22
Paid-in-Capital from redemption fees ⁽¹⁾	—	0.00 ⁽²⁾	0.00 ⁽²⁾	0.00 ⁽²⁾	0.00 ⁽²⁾	0.00 ⁽²⁾
Net asset value, end of period	\$ 12.31	\$ 13.17	\$ 12.38	\$ 8.94	\$ 8.90	\$ 9.72
Total return ⁽³⁾	(6.53)%	6.38%	38.48%	0.45% ⁽⁴⁾	(8.44)%	14.35%
Net assets, end of period (in 000s)	\$ 33,053	\$ 37,287	\$ 36,390	\$ 38,917	\$ 50,714	\$ 61,768
Ratio of gross expenses to average net assets ⁽⁵⁾	1.72%	1.77%	1.74%	1.65% ⁽⁶⁾	1.74%	1.65%
Ratio of net expenses to average net assets	1.50%	1.50%	1.50%	1.50% ⁽⁶⁾	1.50%	1.50%
Ratio of net investment loss to average net assets	(0.84)%	(0.87)%	(0.73)%	(0.90)% ⁽⁶⁾	(1.14)%	(1.01)%
Portfolio turnover rate	25%	44%	20%	46% ⁽⁴⁾	25%	59%

* The Fund's fiscal year end changed from January 31 to December 31, effective February 1, 2012.

(1) Per share amounts calculated using average shares method which appropriately presents the per share data for the period.

(2) Amount represents less than \$0.01 per share.

(3) Total returns are historical in nature and assume changes in share price, reinvestment of dividends and capital gains distributions, if any. The returns shown exclude the effect of applicable redemption fees. Had the advisor not waived a portion of its fees, total return would have been lower.

(4) Not annualized.

(5) Represents the ratio of expenses to average net assets absent fee waivers and/or expense reimbursements by the advisor.

(6) Annualized.

PRIVACY NOTICE

Rev. February 2014

FACTS WHAT DOES NORTHERN LIGHTS FUND TRUST DO WITH YOUR PERSONAL INFORMATION?

Why? Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.

What? The types of personal information we collect and share depend on the product or service you have with us. This information can include:

- Social Security number
- Assets
- Retirement Assets
- Transaction History
- Checking Account Information
- Purchase History
- Account Balances
